Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 May 2001.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The preliminary amendment filed on May 14, 2001, amending claims 11 and 15 and adding claims 17-19, has been entered.

Claims 1-19 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 (partially) and 2-5, drawn to a truncated glucanase of SEQ ID NO:3, classified in class 435, subclass 201.
- II. Claims 1 (partially) and 6, drawn to a truncated glucanase of SEQ ID NO:1, classified in class 435, subclass 201.
- III. Claims 1 (partially) and 7, drawn to a truncated glucanase of SEQ ID NO:2, classified in class 435, subclass 201.
- IV. Claims 8 (partially) and 9, drawn to DNA of SEQ ID NO:4, classified in class 536, subclass 23.2.
- V. Claims 8 (partially) and 10, drawn to DNA of SEQ ID NO:5, classified in class 536, subclass 23.2.
- VI. Claims 11-19, drawn to a method of producing a truncated glucanase, classified in class 435, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are patentably distinct because a protein and DNA are different compounds, each with its own chemical structure and function, and they have different utilities. DNA of Inventions IV and V are patentably distinct as encoding proteins with

Art Unit: 1652

different structures, functions, substrate specificities, and utilities. The protein of Inventions I-III are patentably distinct as having different structures, functions, substrate specificities, and utilities.

DNA molecule of inventions IV-V are not limited in use to the production of polypeptide of invention II-III and can be used as a hybridization probe, and protein of invention I-III can be obtained by a materially different method such as by biochemical purification.

Inventions I-III and VI are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the proteins of Inventions can be chemically synthesized.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Cheng on August 23, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
